

# Melbourne Grove and the Hambleden are Research Active GP Practices

We are always looking for ways to improve your care and where possible, get access to new and novel treatments.

We partner with NHS Research (CRN South Thames) to help gather the information that helps save lives.

If you could be suitable for a study, we may get in touch to let you know.

If you rather we didn't contact you, you can always tell one of the Team, and we'll update your records.

Together we can improve the lives of people with diabetes, cancer, dementia and many other conditions.
